

RECURRING / CUSTOM PAYMENT PLANS

For those merchants that want to enable their customer to make automated or custom payments, our Advanced Terminal gives your customer service reps the ability to create, edit, and delete payment schedules. In addition, we provide your clerks with "Payment Alerts" when automated payments fail and provide them with a program that tracks which cards will be expiring in 60-days.

EASY TO INTEGRATE SOLUTIONS

In today's world, clients want to process payments in their management software to eliminate manual posting efforts. Our APIs and Web services were designed to integrate with your software provider with the latest and greatest technology. Please ASK TO SEE our Developers section for more information.

WHY FUEL?

- Innovative technological development and services
- Timely processing
- Customized reporting
- One-stop shopping for all payment solutions
- Best rates available (for real)
- Quick merchant approval
- Competitive Programs

Finally. The complete payment solution you've been looking for.

RECURRING AND E-CHECK SOLUTIONS

ESTABLISHED – INNOVATIVE – BEST RATES

ACH/ECheck transactions over the phone, through the Internet or through our automated recurring payment module.

In today's competitive business environment, electronic transaction processing has become a commodity-type-product with little to differentiate one company from the next. For This reason, Fuel Payment Processing has adopted a philosophy to distinguish itself from the competition by bringing unique value added services to the market place that will attract both

sales organizations and merchants.

Our platform empowers your company to accept credit/debit card and ACH/ECheck transactions in person, over the phone, through the Internet or through our automated recurring payment module. Fuel provides competitive rates, exceptional customer service and superior responsiveness. But don't take our word for it, just ask our clients.
